SUMMARY

Dedicated DevOps enthusiast with hands-on experience in AWS cloud infrastructure, CI/CD pipelines, and container orchestration, seeking to apply practical knowledge of Terraform, Ansible, Docker, ArgoCD, and Jenkins to contribute to innovative and impactful solutions at acAIberry.

SKILLS

Languages	Python, JavaScript, Bash
Linux	Ubuntu/Linux administration, Bash scripting, SSH, file permissions, package management, systemd, cron jobs, process management
Databases	MySQL (RDS), phpMyAdmin
Containers	Docker, Docker Compose
Orchestration	Kubernetes (K8s) - container orchestration, deployments, services, and pod management
CI/CD	GitHub Actions, Jenkins, ArgoCD, AWS CodePipeline, CodeBuild, CodeDeploy
IaC	Terraform, Ansible - infrastructure automation and configuration management
Version Control	Git, GitHub - branching, pull requests, workflow automation
Cloud	AWS (EC2, RDS, S3, IAM, VPC, CodeBuild, CodeDeploy, CodePipeline, ECR, CloudFront)

PROJECTS

Spring Boot Banking App — Full AWS Deployment

- Deployed a Dockerized Spring Boot + MySQL banking application on AWS EC2 using Docker Compose
- Configured Amazon RDS (MySQL) as the production database and integrated phpMyAdmin for administration
- Set up AWS security groups, IAM roles, and VPC networking for secure multi-tier access
- Debugged real-world issues including security group misconfigurations and ECR URL errors; documented lessons learned

CI/CD Pipeline — GitHub Actions + AWS

- Built separate dev and production GitHub Actions workflows targeting Docker Hub and Amazon ECR
- Resolved pipeline errors including YAML syntax issues, SSH timeout due to security group gaps, and ECR credential passing via envs parameter
- Produced clean markdown documentation for every pipeline stage and error resolution

AWS CodePipeline End-to-End CI/CD

- Configured complete AWS CodePipeline with CodeBuild and CodeDeploy for automated deployments
- Managed CodeBuild environment variable quirks and buildspec.yml configurations
- Wrote detailed reference guides for IAM, EC2, RDS, VPC, and each CodePipeline stage

AWS CodePipeline End-to-End CI/CD

- Provisioned AWS S3 static website hosting entirely through Terraform, automating infrastructure deployment from scratch
- Documented the full Terraform setup and deployment process as a reusable reference guide on GitHub

TRAINING & COURSES

DevOps Training Program

Brodaways Infosys, Kathmandu, Nepal

- Completed a structured DevOps training program covering CI/CD pipelines, cloud infrastructure, and containerization
- Gained hands-on exposure to Jenkins, Docker, AWS services, Linux administration, and deployment automation
- Worked through real-world scenarios covering infrastructure provisioning, application deployment, and system reliability

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

- Tribhuwan University, Kathmandu, Nepal
Awaiting final results
